

# CIS 241

## System-level Programming and Utilities

Welcome! :^)

**Instructor:** Dr. Austin Ferguson

**Pronouns:** he/him

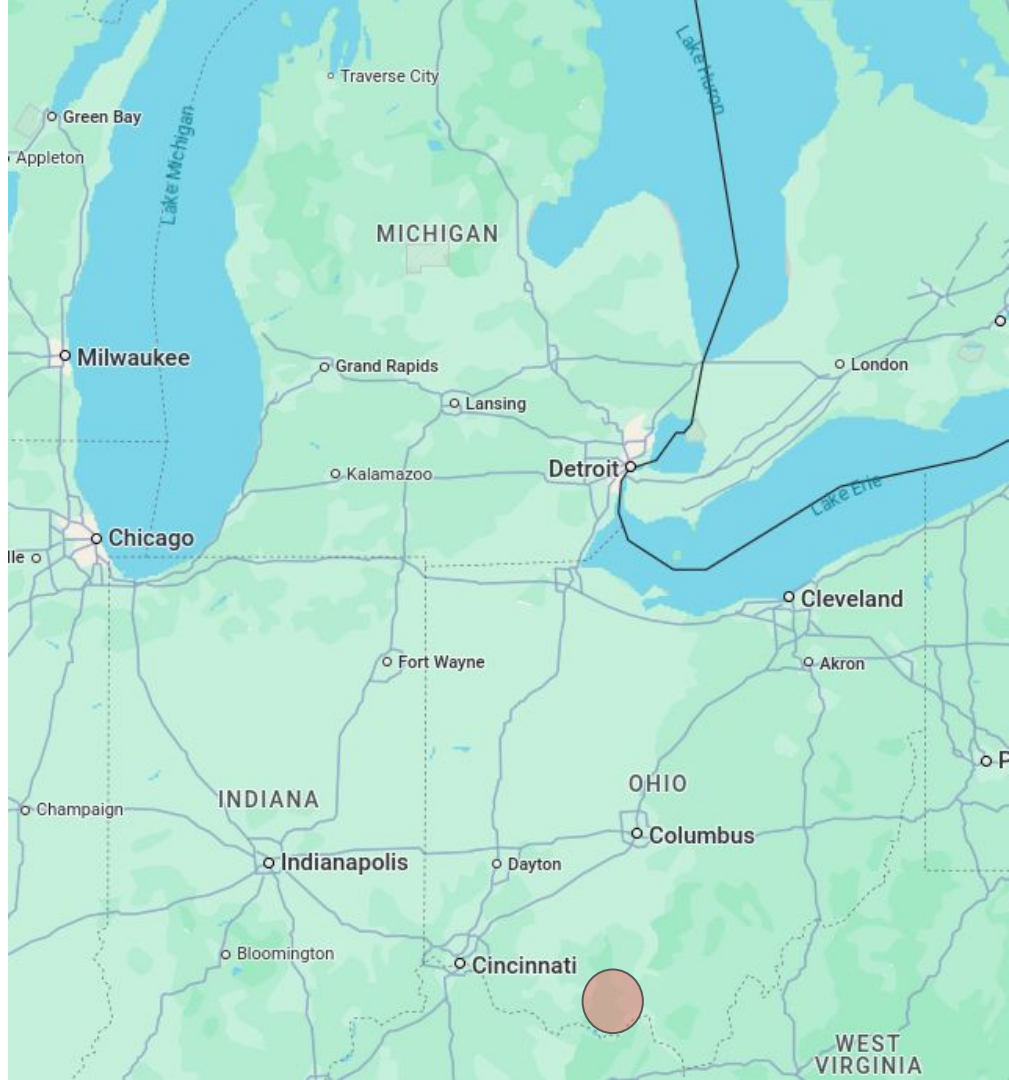

**Email:** [ferguaus@gvsu.edu](mailto:ferguaus@gvsu.edu)

**Office:** MAK D-2-106

Adapted from materials from Dr. Carrier

Who am I?

Grades 🙈

## Grades 🙄

Assignment type	# of assignments	Total % of final grade
Check-in assignments	~ 10	25%
Projects	~ 4	30%
Command line quiz	1	5%
Midterm exam	1	20%
Final	1	20%

Late penalty: 10% per day late, up to 5 days

## Grades 🙈

Assignment type	# of assignments	Total % of final grade
Check-in assignments	~ 10	25%
Projects	~ 4	30%
Command line quiz	1	5%
Midterm exam	1	20%
Final	1	20%

Late penalty: 10% per day late, up to 5 days

## Grades 🙈

Assignment type	# of assignments	Total % of final grade
Check-in assignments	~ 10	25%
Projects	~ 4	30%
Command line quiz	1	5%
Midterm exam	1	20%
Final	1	20%

Project Extensions: 5 free 1-day extensions (together or split) – see syllabus

Late penalty: 10% per day late, up to 5 days

## Grades 🙈

Wednesday deadlines?

Assignment type	# of assignments	Total % of final grade
Check-in assignments	~ 10	25%
Projects	~ 4	30%
Command line quiz	1	5%
Midterm exam	1	20%
Final	1	20%

Project Extensions: 5 free 1-day extensions (together or split) – see syllabus

Link to extension day form (also in syllabus)

# Grades 🙄

<b>A</b>	94%	<b>C</b>	74%
<b>A-</b>	90%	<b>C-</b>	70%
<b>B+</b>	87%	<b>D+</b>	67%
<b>B</b>	84%	<b>D</b>	60%
<b>B-</b>	80%	<b>F</b>	Below 60%
<b>C+</b>	77%		

Final grade is rounded (ceiling function)  
93.05% -> 94%

## Other policies

- SAR Accommodations - happy to help, just reach out ASAP!
- Religious observance - let me know beforehand!
- Collaboration
  - Collaboration welcome on check-ins, but all work should be your own
  - Projects should be kept to conceptual questions (do not share code!)

# Other policies

- Academic misconduct and plagiarism
  - Don't do it!
  - I take this stuff seriously
  - All code and text MUST be your own
- Artificial intelligence (AI)
  - I get it can be helpful, but it's so easy to misuse
  - You should not be generating text/code
    - Obfuscating generated code is still misconduct!

# Other policies

- Regret clause
  - Within 48 hours of a deadline / exam, you can invoke the regret clause if you think you committed academic misconduct
  - You will receive a zero on the assignment, but not an OSCCR report

When in doubt, just ask! I'm here to help!

Extension / late days are way better than misconduct!!!

# A supportive peer community helps with success

## Look for Computing-related student organizations!

git

Why should I care? 🤔

Why should I care?

# Why should I care?

**Terminal:**

# Why should I care?

**Terminal:**

- Accessing servers and HPC systems

# Why should I care?

## **Terminal:**

- Accessing servers and HPC systems
- Efficiency

# Why should I care?

## **Terminal:**

- Accessing servers and HPC systems
- Efficiency
- Running programs without GUIs

# Why should I care?

## **Terminal:**

- Accessing servers and HPC systems
- Efficiency
- Running programs without GUIs

## **Git:**

# Why should I care?

## Terminal:

- Accessing servers and HPC systems
- Efficiency
- Running programs without GUIs

## Git:

- Used everywhere, collaboration

# Why should I care?

## Terminal:

- Accessing servers and HPC systems
- Efficiency
- Running programs without GUIs

## Git:

- Used everywhere, collaboration
- Saves you so many headaches

# Why should I care?

## Terminal:

- Accessing servers and HPC systems
- Efficiency
- Running programs without GUIs

## Git:

- Used everywhere, collaboration
- Saves you so many headaches
- Easy to learn, hard to master – you need practice!

# Why should I care?

## Terminal:

- Accessing servers and HPC systems
- Efficiency
- Running programs without GUIs

## Git:

- Used everywhere, collaboration
- Saves you so many headaches
- Easy to learn, hard to master – you need practice!

## C:

# Why should I care?

## Terminal:

- Accessing servers and HPC systems
- Efficiency
- Running programs without GUIs

## Git:

- Used everywhere, collaboration
- Saves you so many headaches
- Easy to learn, hard to master – you need practice!

## C:

- Understand the low level (memory management)

# Why should I care?

## Terminal:

- Accessing servers and HPC systems
- Efficiency
- Running programs without GUIs

## Git:

- Used everywhere, collaboration
- Saves you so many headaches
- Easy to learn, hard to master – you need practice!

## C:

- Understand the low level (memory management)
- Will improve your high level programming

# Why should I care?

## Terminal:

- Accessing servers and HPC systems
- Efficiency
- Running programs without GUIs

## Git:

- Used everywhere, collaboration
- Saves you so many headaches
- Easy to learn, hard to master – you need practice!

## C:

- Understand the low level (memory management)
- Will improve your high level programming
- Still used in embedded systems
