script
and
history

Adapted from materials by Dr. Carrier

How to remember what we did?

Method #1: Manually record it with `script`

How to remember what we did?

Method #1: Manually record it with `script`

Usage:

```
script <optional filename>
```

Records inputs *and* outputs, can be viewed later (e.g., cat)

How to remember what we did?

Method #2: Look back into our command history

How to remember what we did?

Method #2: Look back into our command history

- Q: How did we do this before?

How to remember what we did?

Method #2: Look back into our command history

- Q: How did we do this before?
  - A: Up and down arrow keys!

How to remember what we did?

Method #2: Look back into our command history

- Q: How did we do this before?
    - A: Up and down arrow keys!

We can also use the `history` command!

How to remember what we did?

Method #2: Look back into our command history

- Q: How did we do this before?
    - A: Up and down arrow keys!

We can also use the `history` command!

Usage:

```
history <optional number of lines>
```
